## What is HUBBOX ?

Hubbox is an **"INDUSTRIAL PURPOSE REMOTE CONNECTION DEVICE"**. It is a complete set of Industrial IoT (IIoT) systems that enable systems to be accessed, monitored and managed remotely by using the PLC, Operator Panel, Driver, Robot etc. in machinery and automation systems.

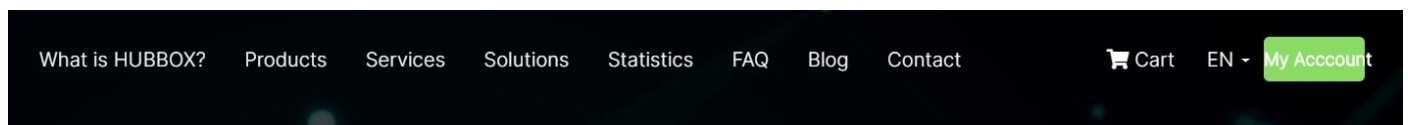

HUBBOX is a device independent of the brand. You can access any networked device remotely as if you were using HUBBOX. Thanks to different access protocols (Ethernet, IP, MODBUS (Serial), MODBUS (Tcp) USB, RS232, RS485), you can access many devices simultaneously with many different protocols.

## HUBBOX Registration

In order to use your “HUBBOX Connect X1” device, you need to create an account of your company at [www.hubbox.io](http://www.hubbox.io).

If the “HUBBOX Connect X1” device has been registered before, you can manage all your devices by connecting to HUBBOX Panel with your account information by logging in at [www.hubbox.io](http://www.hubbox.io).

The first step to access or manage any HUBBOX product is to register or login. You can register or login from the My Account page in the picture below.

If you don't remember your account information, you can use the I forgot my password step.

A screenshot of the HUBBOX login and registration interface. At the top, there are two buttons: 'LOGIN' (highlighted in green) and 'REGISTER'. Below these is a white form box. Inside the form, there is a label 'E-mail (Username)' above an input field with an envelope icon. Below that is a label 'Password' above an input field with a lock icon. Under the password field is a link that says 'I Forgot My Password'. At the bottom right of the form is a green button with a checkmark and the text 'Login'. The background of the page features a dark blue and green abstract network pattern.

If you have a username and password please login or register.

Please fill in the information in the picture above completely and accurately.

This information will be the only authorized and non-duplicate user to access all HUBBOX devices you purchase and own.

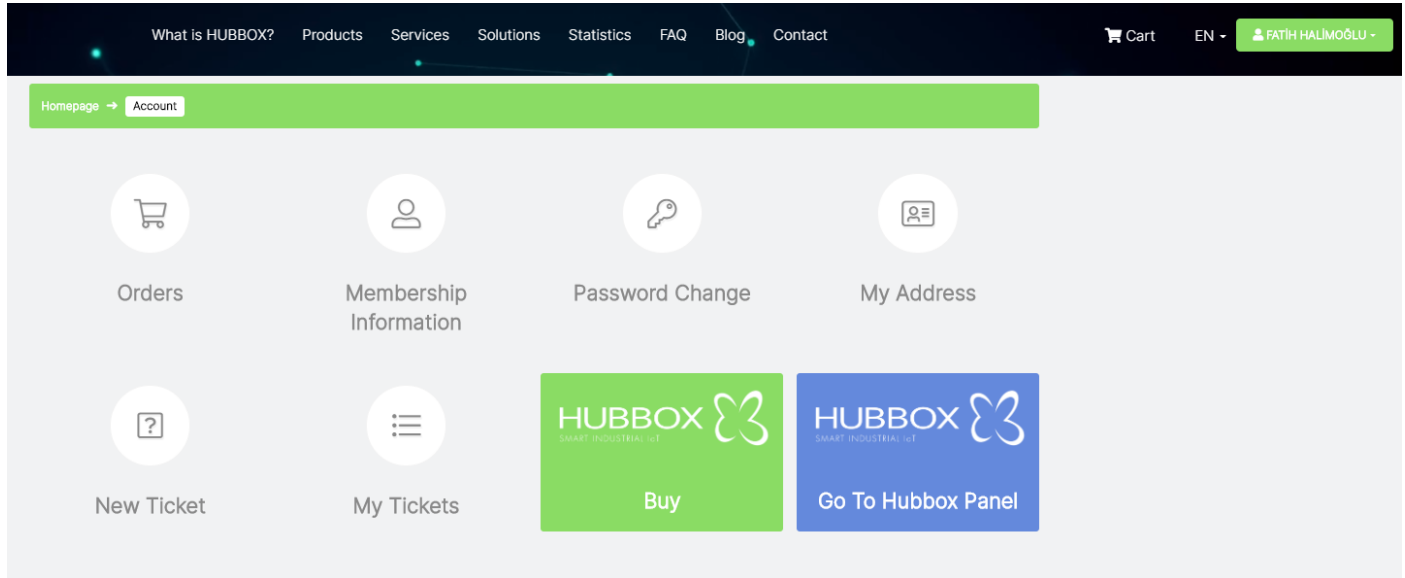

For this reason, it is recommended that this user be created by authorized and accessible people of your company. All financial and administrative accounts of your company are created with the registration form information. You can manage your devices on the "My Account" page that will open when you log in at [www.hubbox.io](http://www.hubbox.io) and view the transactions such as "Order, Support and Shopping" that you have performed before. Some of the information you enter in this form can be changed by communicating in written and interactive ways. Otherwise, "e-mail and telephone" information in the first registration will be changed.

In addition, each user can only be registered once in our system.

The records of people who have not bought the device or registered more than once for the same company are deleted by us at certain intervals.

## Usage of HUBBOX 'My Account ' Page

To login to the account page, you must register on the [www.hubbox.io](http://www.hubbox.io) website and enter the account information first. When you log in with the correct information, the "My Account" page below opens. From this page, you can access **"HUBBOX Panel"** and other menus.

**Orders page:** You can view the status of your orders.

**Subject :** Select previously defined support topics.

**Title :** Enter a short title describing the problem you are having on the topic you selected.

**Description:** The text area where you can explain the problem you are having.

**Add File :** Upload any screenshot or log files that shows the problem you are having. You can add multiple files.

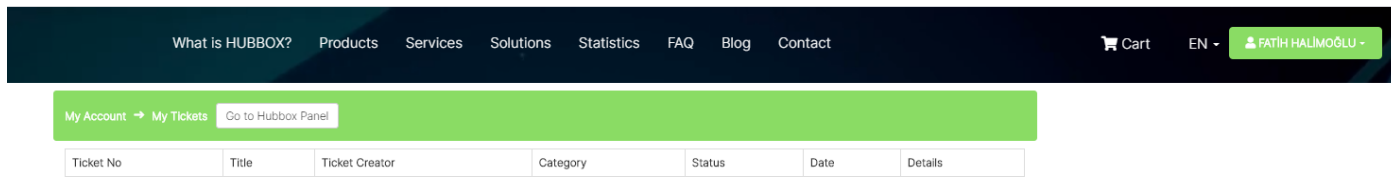

When creating a support record, the most important point you will pay attention to is to explain your problem under the right topic and in a single support record.

The support registration is created immediately in our system.

Our support staff solves the problems in order of priority and importance.

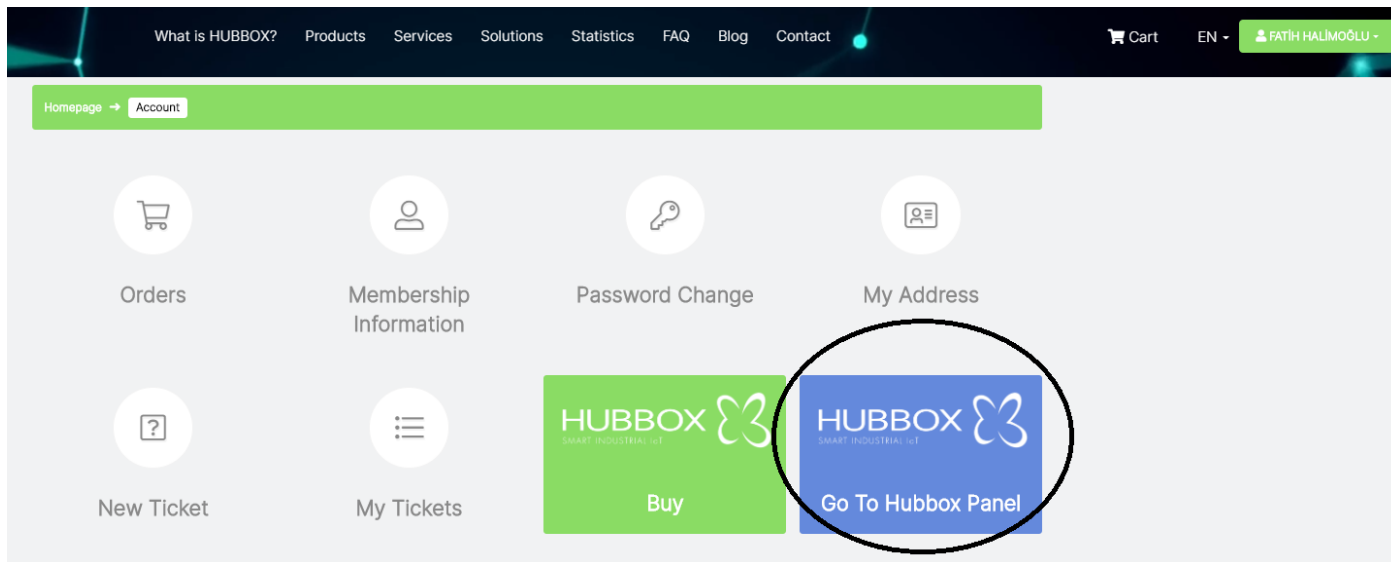

## My Support Tickets Page :

You can view the status of the support records you have opened for your HUBBOX device and other problems.

## “Go to HUBBOX PANEL BUTTON”

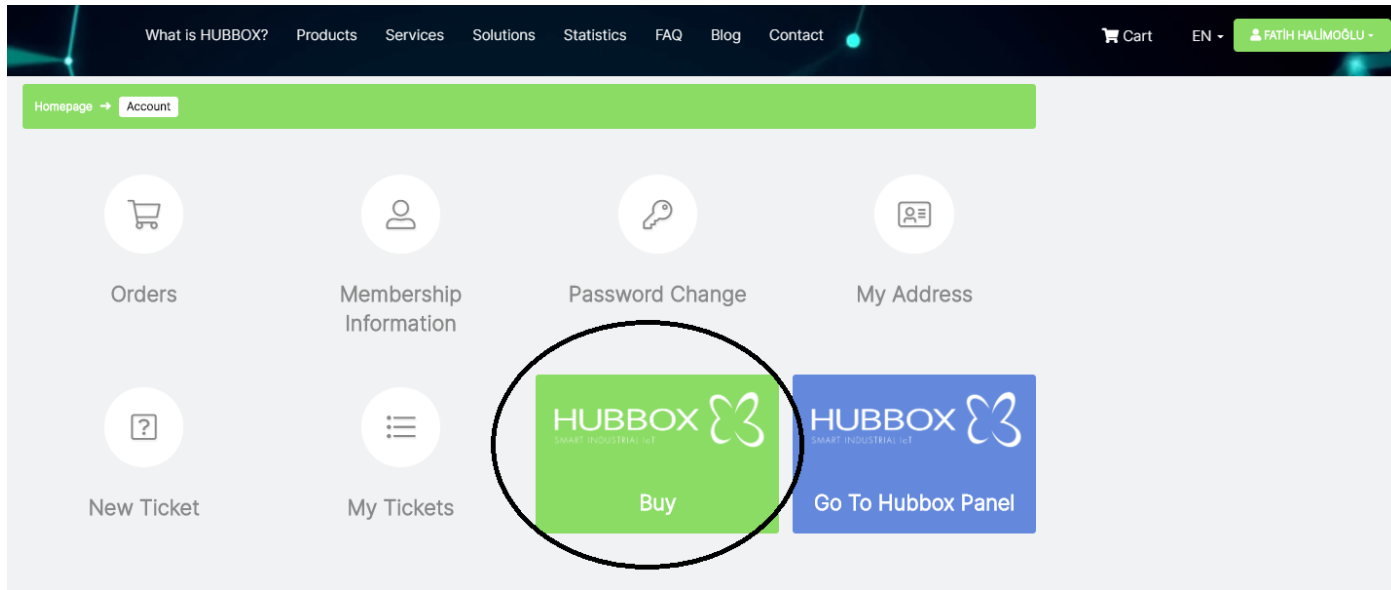

You can login to the panel where you can manage your HUBBOX devices from anywhere in the world.

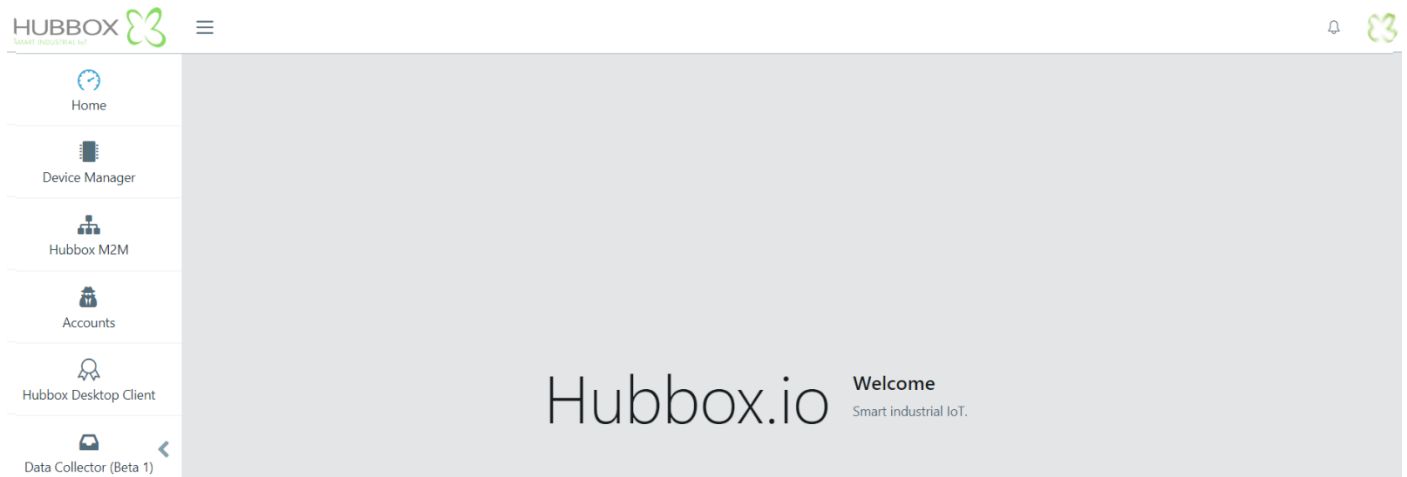

## HUBBOX PURCHASE PAGE

You can order "HUBBOX Connect X1".

### What is HUBBOX Panel ?

After creating your company account at [www.hubbox.io](http://www.hubbox.io), you can access your "HUBBOX Connect X1" devices by clicking the "Go to HUBBOX Panel" button from the "My Accounts" page.

### How to access HUBBOX Panel?

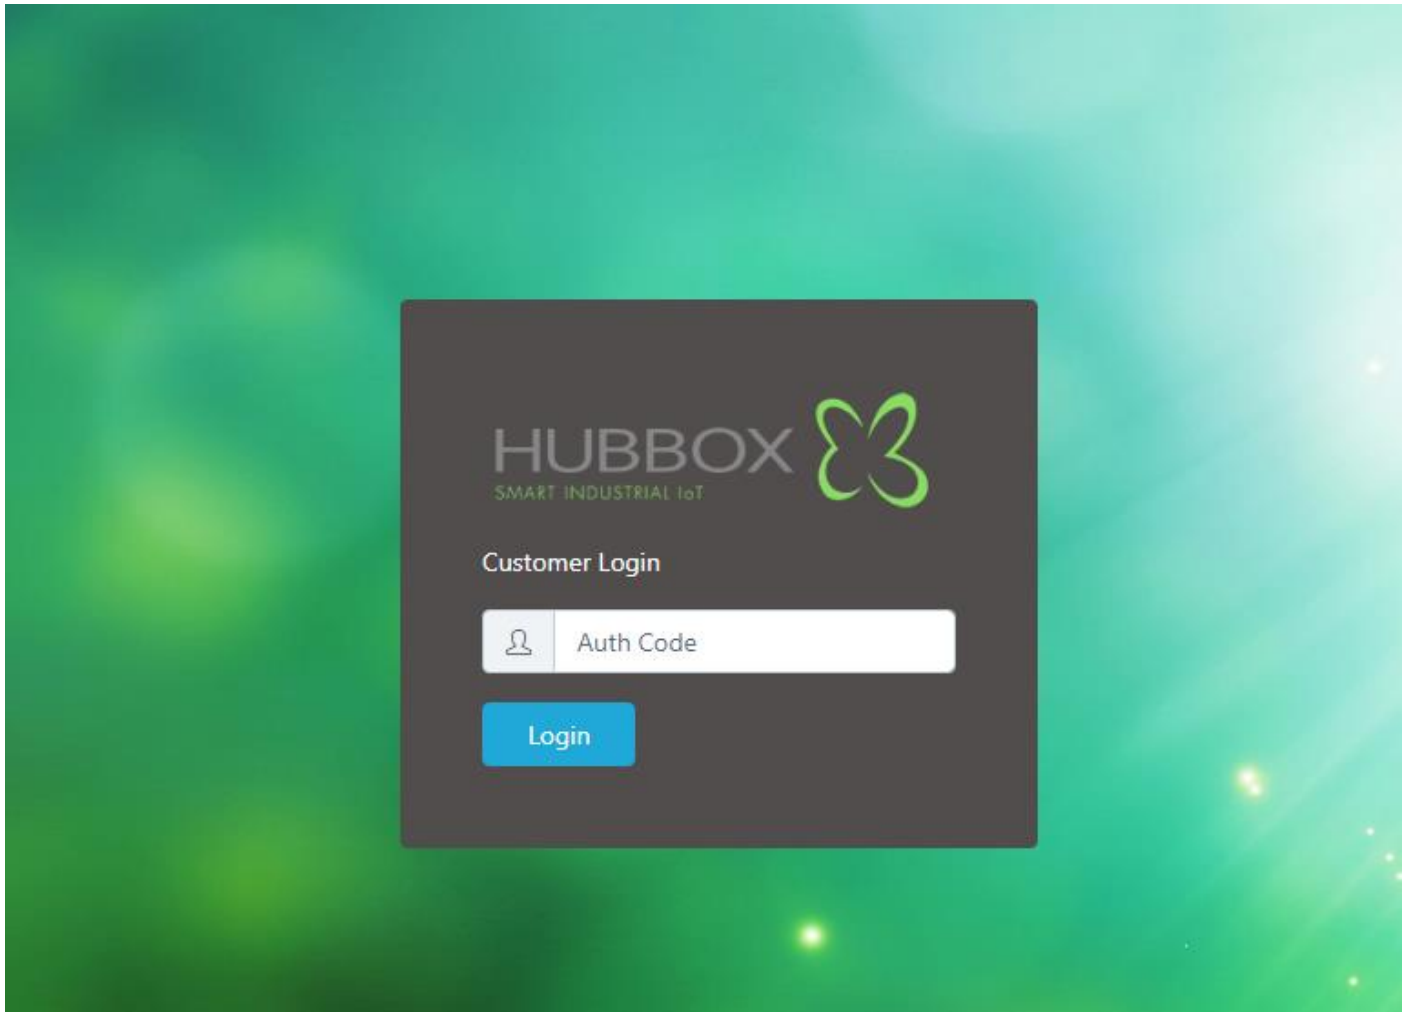

You can access 2FA verification screen by clicking the "Go to HUBBOX Panel". When you login for the first time, a unique "QR Code" is displayed only for you.

It is expected to enter the "PIN" code, which is generated at various time intervals with the "Google Authenticator" application. "HUBBOX Panel" account of each company is unique.

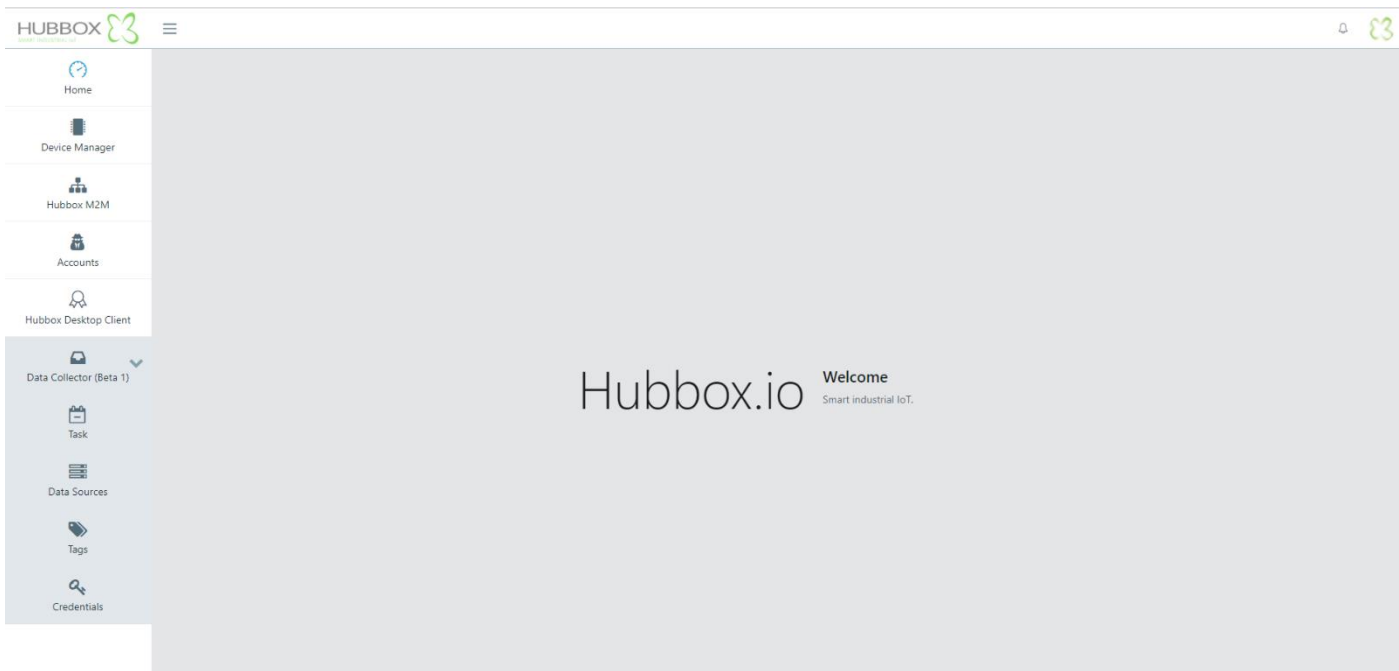

**Note:** "QR Code" on the first login screen is created only once and displayed to you. That's why you should never refresh that page. When the code is generated, download the "Google Authenticator" application to your mobile phone and read the code generated to the "Google Authenticator" application.

In order to re-create the "QR Code", you must send the required documents of your company official to the address "qrcode@hubbox.io" via the e-mail address defined in our system, "Identification information of the Company Official, documents showing the title and tax number registered in our systems".

After calling the call center to confirm the accuracy of the information, a new "QR Code" is created and this code is special and unique.

# Usage of HUBBOX Panel

	Home
	Device Manager
	Hubbox M2M
	Accounts
	Hubbox Desktop Client
	Data Collector (Beta 1)

- You can add HUBBOX devices to the system and create a network. You can create a WiFi Profile file for your HUBBOX.**
- You can manage all the networks you have created and your HUBBOX in the network.**
- You can create and manage downstream users to connect to your HUBBOX Devices.**
- You can download our HUBBOX Desktop Client application to connect to your HUBBOX devices.**

## Hubbox M2M Networks

A Network is created for each HUBBOX you have registered. Configuration settings, user permissions, IP configuration and user statistics of HUBBOX within the network are made by accessing the networks created under "**Hubbox M2M**".

The screenshot shows the Hubbox M2M Networks dashboard. The left sidebar contains navigation links: Home, Device Manager, Hubbox M2M, Accounts, Hubbox Desktop Client, and Data Collector (Beta 1). The main content area displays a list of networks. At the top, there is a search bar with 'All Tags' and a 'Search tag' button. Below this, three network cards are visible:

- Office 4026** (network\_228.hubbox.io): Created on 2019 April 09. Includes a tag input field with 'dddd'.
- NETWORK-1556808054470** (network\_240.hubbox.io): Created on 2019 May 02. Includes a tag input field with 'dddd'.
- fatihev-network** (network\_365.hubbox.io): Created on 2020 April 19. Includes a tag input field with 'Tags'.

The screenshot shows the detailed view of the 'fatihev-network' (network\_365.hubbox.io). The left sidebar is the same as the previous screenshot. The main content area has a breadcrumb trail: Home / Network M2M / fatihev-network. Below this, there are tabs: Dashboard, Users, Boxes, and Network Configuration. The 'Dashboard' tab is active, showing:

- Shortcuts:** A link to 'Allow User'.
- Status:** A list of network status checks, all marked with green checkmarks: Ping, HTTP, HTTPS, and DNS.
- Plan:** A section titled 'Service Plan Detail' showing 'Plan1'.
- Stats:** A section for network statistics.

Below the main content area, there is a section for the network details, including the 'Create date: 2020-04-19T00:32:52.000Z', 'Expired date: 2021-04-18T21:32:52.000Z', and 'Sell date: 2020-04-19T00:32:52.000Z'.

## Device Manager

You can register devices you have purchased. You should also use this menu if you want to upload WiFi settings to your devices via USB port. You can see statistics of your devices such as instant connection, traffic, and change device name.

The image shows a web interface for adding a sub-account. On the left is a sidebar with navigation links: Home, Device Manager, Hubbox M2M, Accounts, Hubbox Desktop Client, and Data Collector (Beta 1). The main content area is titled 'Home / Sub Account List / Sub Account Add'. It contains a form with the following fields: 'Name Surname' (text input), 'E-mail' (text input), 'GSM' (text input), 'Password' (text input), and 'Confirm Password' (text input). Below these fields are two toggle switches: '2Fa (Google Two Factor Auth)' and 'Status', both currently turned on.

## Hubbox Desktop Client

After creating your company's account at [www.hubbox.io](http://www.hubbox.io) , you can download the "HUBBOX Desktop Client" from panel.The compressed "Hubbox.zip" file is opened and the "Hubbox\_Desktop\_Client.jar" and "Hubbox\_Desktop\_Client.exe" files are copied to any folder.

When "Hubbox\_Desktop\_Client.exe" is run from the copied files, the "Hubbox Desktop Client" software makes the necessary setup and settings.

It enables the users that you have opened from the "HUBBOX Panel -> Accounts" menu and authorized by "Hubbox Networks -> xNetwork -> Allow User" to access the industrial devices connected to HUBBOX devices.

## HUBBOX Desktop Client Application

After creating an account of your company at [www.hubbox.io](http://www.hubbox.io), you can access all the "HUBBOX Connect X1" devices and connected automation systems that you have purchased with the "HUBBOX Desktop Client Application" that you can download and register from the HUBBOX Panel application.

You can download "HUBBOX Desktop Client Application" from HUBBOX Panel. Open the "Hubbox.zip" file that you downloaded and copy the files in an empty folder. "Java Client" must be installed on your computer. Run the "Hubbox\_Desktop\_Client.exe" file that you copied into the folder.

The login screen for Hubbox Desktop Client 5 features the Hubbox logo (a green stylized 'X' shape) and the text 'HUBBOX SMART INDUSTRIAL IoT'. Below the logo, there are two input fields: 'Username' and 'Password'. The 'Username' field has a blue highlight on the left side. The 'Password' field has a series of black dots for masking. Below the 'Password' field, there is a checkbox labeled 'remember' and an 'OK' button. At the bottom left, there is a 'Find Local Device' button. At the bottom right, there is a version number 'v5'.
